**EQUIPMENT:**

- Halter and lead-rope.

**OBJECTIVES:**

- To tie the horse safely.

**HOW WILL THIS HELP ME?**

I can untie the quick-release knot rapidly in an emergency.

**HOW DO I DO IT?**

See photographs of the steps below.

**HORSEMANSHIP CONCEPTS:**

- When a horse is pulling back, he is totally unaware of you, so be very careful.
- Preparation takes time; regret lasts forever.
- Teach your horse to “follow a feel” before you tie him up.
- A little preparation is better than a lot of precaution.
- Tie dogs low and horses high.
