

AMERICA'S HORSE CARES

Grant Recipients 2018

Through the use of equine assisted activities and therapies (EAAT), thousands of special-needs individuals can experience the rhythmic motion of a horse. Riders move fluidly with the horse to improve balance, muscle strength and flexibility. This movement which mimics the human gait allows those with physical, cognitive or emotional limitations to enjoy the same freedoms we take for granted.

The America's Horse Cares grant program awards funding to centers that provide equine assisted activities and therapies to individuals with special-needs. Funding supports continuing education and professional certification for therapists, mental health professionals, employees and volunteers who work one-on-one with clients to provide much needed care. Through America's Horse Cares, the Foundation has awarded 308 grants totaling over \$1 million to support EAAT.
