
APPLICATION FOR FROZEN OOCYTE PERMIT

I hereby acknowledge that I have read and agree to be bound by and follow the AQHA rules pertaining to frozen oocytes. I also understand that AQHA will investigate non-compliance with these rules and, in the event of such non-compliance, any resulting foals may be ineligible for registration.

A frozen oocyte is an **unfertilized** egg flushed from a donor mare that is preserved in frozen storage for purposes of being subsequently fertilized and transferred into a recipient mare at a later date. This form is **not** to be used to request a permit for a frozen embryo for which there is a separate form. A frozen embryo is a **fertilized** egg flushed from a donor mare that is preserved in frozen storage for purposes of being transferred into a recipient mare at a later date.

I understand that one Frozen Oocyte Permit is required to register a foal produced using an oocyte from a mare no longer in my ownership. The signed permit will serve as the mare owner's signature on the breeder's certificate for registration of the foal. Breeder's certificate requirements regarding the stallion owner's signature must still be met in order for the foal in question to be eligible for registration.

As the mare owner, I understand that I must ensure that a sufficient number of Frozen Embryo and/or Frozen Oocyte Permits are purchased prior to my sale of the mare, and I understand that I must complete an application for each permit needed. Once the ownership changes, I understand that I may no longer purchase Frozen Embryo or Frozen Oocyte Permits from AQHA.

Mare's Name

Registration Number

Please mail the Frozen Oocyte Permit to:

Name

AQHA ID Number

Address

City, state and zip code

Telephone Number

Signature of mare owner or authorized agent

AQHA ID Number

Date Signed

\$75 is enclosed for this permit.
